

Sprint Planning Meeting

Date	30/08/2024
Time	5:00PM - 7:00PM
Attendees	Andrique, Melissa, Shaun, Jaemin, Gwyneth, Bernice
Apologies	

Sprint No.	1
Sprint Goal	Implementation of product backlog and creation of task
Scrum Master	Jaemin Park

Planning Poker

Selected User Stories	Final Story Point Estimate
As a user, I want to be able to create user stories within the product backlog, so that I can assess what we need to do for the rest of the project	3
As a developer, I want to be able to update the attributes of any given task at my discretion, so that the project management software accurately reflects the current project status	2
As a team member, I want to update the status of my tasks (to do, in progress, completed) on the board, so I can be aware of my progress.	2
As a team member, I want to view the sprint backlog, so that I can understand the overall goal of the current sprint	4
As a developer, I want to be able to create a task and set some initial attributes to the task such as time and description, so that I can keep track of what needs to be done.	3
As a developer, I want to easily add in tasks to each sprint so that any new requirements given can be easily covered.	1

Action Items	Owner
- Set up an online database using AWS RDS	Andrique
- Draft a basic SQL database schema with a tasks table in MySQL workbench (for now)	Gwyneth
- Finish up meeting minutes	Jaemin
- Begin planning views on figma <ul style="list-style-type: none"> - Login, product backlog/task view, task creation 	Bernice, Shaun, Melissa
- Update Jira with story points - Move user stories to sprint backlog	Everyone
