Noted challenges for Agile

Sprint 1 (11/09/2024)

Date	Challenge	Response, application and outcome
30/08/2024	Confusion regarding what to do	Further breakdown of user stories into tasks (@31/08/2024) Facilitated a better view of what exactly needed to be completed. Saw improvements in productivity and logging.
30/08/2024	Lack of communication within located channels	Could commit to more in person meetings on campus (@07/09/2024) Recent in person meetings have been very productive, a lot of communication between members. Will note for future sprints.
04/09/2024	Lack of progress towards task	Could specifically allocate people a specific task. (@07/09/2024) Still seeing a lack of progress (@09/09/2024) Turns out it was simply the lack of communication. Team members have been working on their own respective parts individually. Will note communication
09/09/2024	Lack of communication led to unease within group	Due to lack of communication, people thought no one else was doing work. Definitely to note to improve communication. Since it is impossible to meet in person all the time, we could try to use our online options more. (@10/09/2024) In person combined with online communication works extremely well. Work is being communicated and clear progress is being seen. Group now has a direction
09/09/2024	Lack of communication led to overlapping of work	Due to lack of communication, people have been working on tasks others were already working on. Again could use online communication options more in order to supplement in-person meetings. (@10/09/2024)

		Supplementation of in-person meetings with online meetings working very well. Work delegated with speed and efficiency. We are exactly sure of what we need to work on
