Risk Encountered from Risk Register

Date	06/10/2024
Sprint	3
Scribes	Melissa, Jaemin, Bernice, Shaun, Andrique, Gwyneth

Risk	Description of risk	Comments
R5	Project documents are lost or destroyed	Some confusion around the documentation it is unclear if the product owner has missed the documentation regarding the definition of done discussion or if this was not submitted among the other documents.
R6	Technical skill difficulty in translating the design into a functional product.	Sprint 3 contained many difficult tasks such as the manipulation of data to create charts or complex display of information, this has made development difficult to complete. Issues were resolved in the end however considerable amount of time was spent during development.
R16	Group members timetables not lining up	Having conflicting schedules has delayed meetings and made working in person a bit challenging, use of discord calls made it easier for team members to attend virtually however that was sometimes less productive.
R26	Members are busy with assignments and cannot put in as much time into the project	Team members overwhelmed by other assignments, unable to commit as much time to implementation as they would like.
R27	Trouble with VScode livesharing resulting in either lost of erroneous code	Some complex tasks required multiple people to work on it at the same time tools such as VScode livesharing was used however sometimes there were issues with syncing resulting in lost code.
R28	Team members not kept in the loop after missing meetings resulting in either a issue with task allocation or an overlap of work	Some members were unable to attend meetings due to conflicted scheduling, the lack of participation has resulted in important information being missed and a pause in productivity.
